

MAKING WAVES IN
WOMEN'S HEALTHCARE
& DIAGNOSTICS

THE WOMEN OF OUR COMMUNITY ARE OUR INSPIRATION. WE WANT TO ENSURE THAT YOU, AND EVERY WOMAN IN THE CAYMAN ISLANDS, HAS A FACILITY AVAILABLE TO RECEIVE THE CARE AND SUPPORT FOR ALL OF YOUR NEEDS.

OceanMed's diverse team of care providers delivers the highest standards of healthcare using the most advanced screening and diagnostic tools available – all at a competitive low cost. With individualized care plans tailored to each patient, we are dedicated to supporting our patients in a compassionate and collaborative environment.

EXPLORE OUR EXTRAORDINARY FACILITY

OceanMed is not your typical clinical experience. Our facility is located in central George Town with stunning ocean front views and designed to promote comfort and relaxation. A blend of technology and personal touch will ensure that you will have a seamless and comfortable experience from registration to discharge.

OceanMed is equipped with a patient lounge for women to relax before their appointments, as well as sensory exam suites with calming visuals, music, and aromatherapy. It is designed to shift the traditional sterile clinic environment to a comfortable and serene atmosphere.

YOU'RE NOT ALONE.

At OceanMed, we understand that the healthcare system can be confusing and that waiting on test results can be scary.

With expert medical staff and an on-site radiologist, we will be able to provide you or your doctor with fast imaging and lab results. It is OceanMed's goal that no patient leaves the facility without feeling informed and knowing what the next step will be. We want to transform your experience by eliminating worry, anxiety, and stress that is often associated with healthcare.

Our women's healthcare coordinator is there to serve as a liaison between you, your physicians, our laboratories, hospital admissions, and overseas referrals to facilitate your care. She will help you navigate the healthcare system and educate you and your family on treatments, procedures, and continuing care.

WE GO BEYOND TREATING SYMPTOMS OR
A DISEASE. OUR TEAM IS HERE TO OFFER
INTEGRATIVE CLINICAL AND PUBLIC SUPPORTS
THROUGHOUT YOUR ENTIRE HEALTHCARE
JOURNEY.

SEE WHAT WE HAVE TO OFFER

PHYSICIAN SERVICES

OceanMed has fulltime on-site Obstetrician/ Gynecologists who can provide services during all stages of a woman's life. Our OBGYNs specialize in many common female issues such as fertility treatments, minimally invasive procedures, and all pre- and post-natal care.

PATIENT SERVICES AND SUPPORT

OceanMed offers specialized patient services to create a better experience and help you navigate your own healthcare.

- + Same day services and flexible appointment times
- + State-of-the-art facility that uses latest technology to enhance patient senses to reduce anxiety
- + In-person follow-up allowing for improved patient-provider communication, assurance, and understanding
- + Short turn-around times for biopsy results provided by an accredited laboratory
- + Services that meet needs at every stage of life, from pre-menstrual to post-menopausal
- + Online patient portal provides convenient access to personal information, scheduling appointments and submitting documentation

IMAGING AND DIAGNOSTIC SERVICES

Using the most advanced medical imaging equipment in women's health, OceanMed provides a wide range of diagnostic services, some of which are not available anywhere else in the Cayman Islands. These modalities and examinations include:

Ultrasound

- + All gynecological examinations
- + Fertility assessments and treatments
- + Diagnostic obstetrical scans
- + Elective 3D/4D obstetrical scans
- + All abdominal, musculoskeletal, and vascular examinations
- + Automated breast ultrasound and targeted breast ultrasound

Mammography

- + 3D screening and diagnostic mammograms
- + Contrast enhanced spectral mammography

Diagnostic Procedures

- + Minimally invasive prone stereotactic breast biopsy
- + Ultrasound guided biopsies and aspirations

DISCOVER WHAT MAKES US DIFFERENT

ADVANCED ULTRASOUND TECHNOLOGY ▶

Our ultrasound systems are designed for advanced women's health practice. They set a new standard for imaging performance, providing remarkable 2D and 3D/4D images and an unparalleled ability to image a comprehensive range of complex women's health issues.

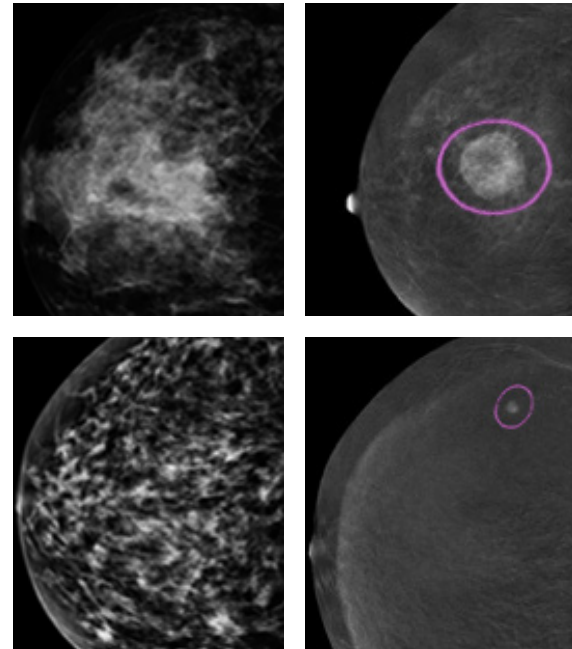

◀ GE INVENIA ABUS™

Our Automated Breast Ultrasound System (ABUS) is an innovative breast cancer screening for women with dense breast tissue that uses ultrasound waves rather than ionizing radiation. It can improve breast cancer detection by 55 percent over mammography alone.

STATE-OF-THE-ART MAMMOGRAM INNOVATIONS ▶

At OceanMed, our 3D breast mammogram system with Contrast Enhanced Spectral Mammography (CESM) can highlight additional information, such as unusual blood flow, allowing for greater precision in breast cancer diagnosis. CESM transforms your mammogram experience by providing the ability to diagnose breast cancer in one appointment and one setting, in less than 7 minutes. With high specificity and sensitivity, it can also greatly reduce the chances of unnecessary biopsies and surgeries.

Under the radiographer's guidance, you will also have access to the Pristina Dueta – a remote controlled compression device that allows you to play an active role in determining the level of breast compression. This helps remove the stress and worry from the screening process, allowing you to be in control.

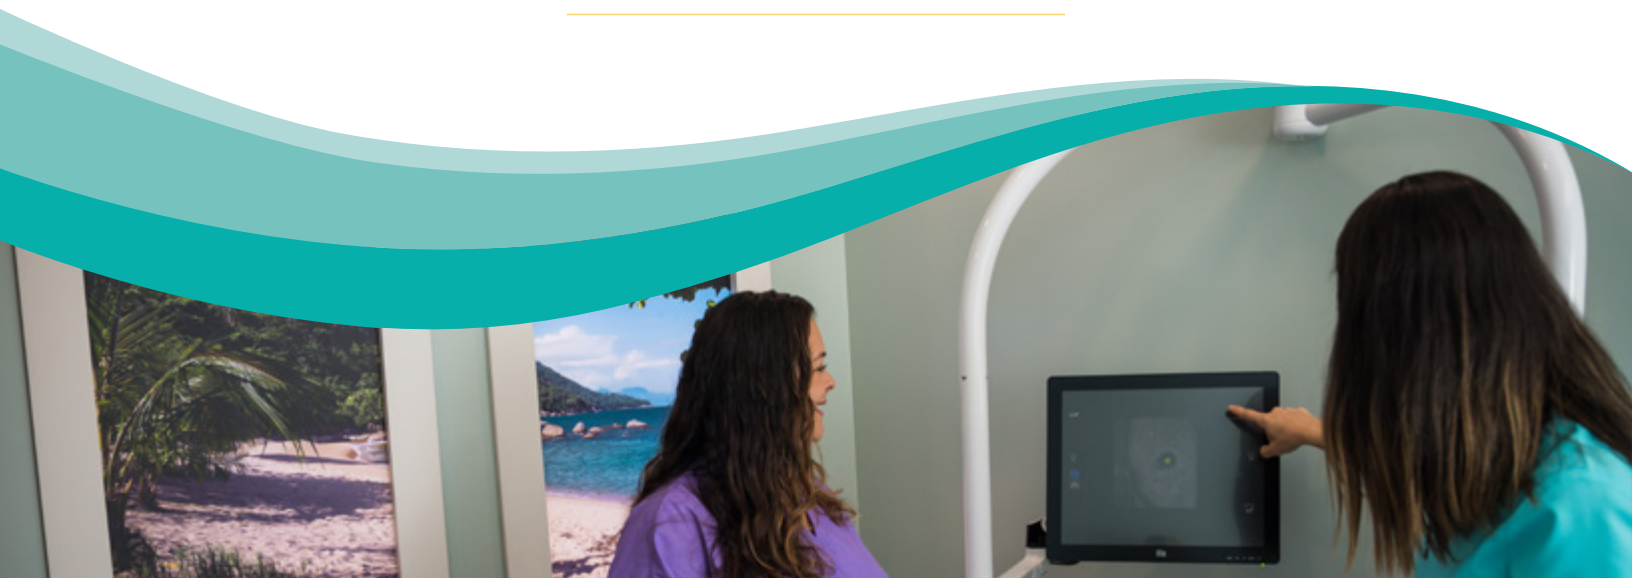

OCEANMED IS THE ONLY FACILITY WITH CONTRAST ENHANCED SPECTRAL MAMMOGRAPHY AND PATIENT-ASSISTED COMPRESSION AVAILABLE IN THE CAYMAN ISLANDS.

A FASTER AND MORE COMFORTABLE BREAST BIOPSY SYSTEM

Our breast biopsy system is the only machine of its kind that allows you to be prone (laying on your stomach) during the procedure, which means you do not have to watch the needle and biopsy taking place. The system is designed with patients' physical and emotional comfort in mind, with 95% of patients reporting that their procedure was faster, more comfortable, and less painful than expected. With increased automation, 360-degree access to the breast, and superior images, this technology creates a better experience for both you and your provider.

OCEANMED IS THE ONLY FACILITY WITH THE EQUIPMENT AND TECHNOLOGY TO PERFORM A PRONE STEREOTACTIC BIOPSY PROCEDURE IN THE CAYMAN ISLANDS.

At OceanMed, we encourage you to take control of your healthcare and become your own advocate, while supporting you every step of the way. Our aim is to empower you to make informed decisions about your health that allow you to enjoy your life to the fullest.
